2012 IBC update

ADHESIVE ANCHOR INSTALLER CERTIFICATION REQUIREMENT FOR NEW YORK CITY

The New York City Department of Buildings has adopted the 2012 IBC, which references the American Concrete Institute Building Code Requirements for Structural Concrete (ACI 318-11). In ACI 318-11 section D.9.2.2 through D.9.2.4 specific provisions for adhesive anchor systems installed horizontally or upwardly inclined, and supporting sustained tension loads, are given. These provisions include requirements for installers to be certified in accordance with the ACI/CRSI Adhesive Anchor Installer Certification program or equivalent.

Hilti now offers an Adhesive Anchor Installer Certification Program (HAAICP)* in the New York City area to all construction professionals who desire to improve their knowledge in this area and/or who seek to fulfill the code requirement for certification.

Who should attend: Contractors, inspectors, and building code officials

REGISTER TODAY

www.us.hilti.com/anchortraining

Visit above website for available course locations, dates, and times. Individuals attending the one-day course for the first time shall register for the full course at \$300 per person. Credit cards only accepted at this time. Pre-work will be assigned to participant once registered.

*HAAICP is offered as an "equivalent" program per ACI 318-11 Appendix D Section D.9.2.2. It has been deemed acceptable by the New York City Department of Buildings for projects in New York City. "Equivalence" in other jurisdictions must be determined by the Project Engineer or Authority Having Jurisdiction.
