

PRODUCTIVITY ON DECK

Hilti is there for you from start to finish

Get ahead of the game and make post pour drilling and coring a thing of the past. Optimize your anchor points and through penetrations with Hilti innovation. Whether you are running pipes through a slab or anchoring your cable trays, conduits, HVAC ducts, or pipe runs, Hilti provides solutions that will bring increased productivity and efficiency to your installation process.

CAD SERVICES

LAYOUT

ANCHORS

FIRESTOP

OPTIMIZE YOUR DECK

CAD SERVICES

- Helps to ensure that the files received by layout crews are optimized and feature relevant information needed to complete the job
- Increases productivity through providing clarity to digital drawings
- Offers simple file cleaning, aligning, overlaying multiple drawings, 3D flattening, and Point Creation

ANCHORS

- Brings speed and efficiency to overhead pipe hanging applications
- Allows for quicker installation of overhead pipe hanging supports by installing anchors prior to the concrete pour
- New and innovative push-to-connect solution, along with a full portfolio of cast-in anchors for wood form work and metal deck projects

FIRESTOP

- One-step firestop solution reduces installation time, cuts down on labor, increases productivity and makes inspection a breeze
- Customized solutions eliminate wasted time cutting and assembling devices on the job
- Products for both wood form work and metal deck projects

LAYOUT

- Offers a true speed benefit of pre-cast devices to more quickly and precisely locate and mark the installation locations for firestop devices and anchors
- Helps take the effort out of deck layout with intuitive software and industry leading support
