

# FINISH WITH POWER AND FLEXIBILITY

## Installation drill/driver SFE 2-A12

When you need options to get into tough to reach places, the SFE 2-A12 delivers controlled power for finish work. The 1/2" metal drill chuck allows for a greater range of bits to be used, offering you versatility and flexibility on the jobsite. Designed to last, the SFE 2-A12 brings high performance and comes with the backing of the same 20-2-1 Hilti warranty you have come to know and trust.

## APPLICATIONS AND ADVANTAGES

- All-in-one versatility with four exchangeable chucks: offset, right-angle adapter, 1/2" keyless metal chuck and hex bit holder
- Equipped for precision work — with two bright LEDs, a magnetic bit holder and 15-step clutch, protecting your materials
- Minimize tool downtime - brushless motor makes this tool virtually maintenance free
