4. Waste/Overflow Fitting -- Nom 1-1/2 in. diam brass waste/overflow fitting installed through device coupling and seal. Seal seated from bottom within device coupling. Min concrete thickness of 2 in. shall be maintained below tub box.

2. Firestop Device* - Tub Box -- Nom 8-1/2 by 12 by 2 in. deep acrylonitrile butadiene styrene (ABS) tub box with flexible foam furnished in the form of tubing.

1. Floor Assembly -- Min 4-1/2 in. thick reinforced lightweight or normal weight (100-150 pcf) concrete.
Notes:

1. Refer to section 1509.4 of the specifications. For Quality Control requirements, refer to the Quality Control section of the specification.
2. Details shown are typical details. If field conditions do not match requirements of typical details, approved alternate details shall be submitted. Field conditions and dimensions need to be verified for compliance with the details, including but not limited to the following:
   - Minimum and maximum widths of joints.
   - Type and thickness of fire-rated construction. The minimum thickness of the firestop shall be equal to the thickness of the adjacent construction.
3. For alternate details matching the field conditions are not available, manufacturer's engineering judgment drawings are acceptable. Drawings shall be shown in the International Firestop Council's guide "Guidelines for Evaluating Firestop Systems" and the UL Fire Resistance Directory. Refer to section 15084 of the specifications for Quality Control requirements.
