

System No. C-AJ-8336

 Floor or Wall Assembly — Min 4-1/2 in. (114 mm) thick reinforced lightweight or normal weight (100-150 pcf or 1600 - 2400 kg/m3) concrete. Wall may also be constructed of any UL Classified Concrete Blocks*. Max diam of opening 4 in. (102 mm). See Concrete Blocks (CAZT) category in Fire Resistance Directory for names of manufacturers.

The F Rating of the firestop system is equal to the hourly rating of the floor assembly.

2. Through Penetrants — One pipe, conduit or tube to be installed within the opening. Annular space between the penetrants and the periphery of the opening shall be min 3/8 in. (9.5 mm) to max 1-1/2 in. (0 mm to max 35 mm). Penetrants to be rigidly supported on both sides of floor or wall assembly. The following types and sizes of metallic pipe, conduit or tubing may be used:

- A. Steel Pipe Nom 3/4 in. (19 mm) diam (or smaller) Schedule 5 (or heavier) steel pipe.
- B. Iron Pipe Nom 3/4 in. (19 mm) diam (or smaller) cast or ductile iron pipe.
- C. Conduit Nom 3/4 in. (19 mm) diam (or smaller) rigid steel conduit or steel electrical metallic tubing (EMT).
- D. Copper Pipe Nom 3/4 in. (19 mm) diam (or smaller) regular (or heavier) copper pipe.
- E. Copper Tube Nom 3/4 in. (19 mm) diam (or smaller) Type L (or heavier) copper tube.
- 3. Insulated Metallic Pipe Assemblies* (BONH Category) A max of one nom 7/8 in. diam or smaller copper pipe or tube provided with nom 3/4 in. (19 mm) thick (or less) low density polyethylene (LDPE) flexible foam. The annular space between the insulated penetrant and the periphery of the opening shall be min 3/8 in. (9.5) to max 1-1/2 in. (38 mm). Insulated penetrant and non-insulated penetrants to be tightly bundled together.

PDM US LCC - GelCopper and GelBlack PREINSULATED COPPER ROLL

- 4. Cables Max one, 4 pair, 18 AWG (or smaller) thermostat cable with PVC insulation jacket. The annular space between the cable and the periphery of the opening shall be min 0 in. (point contact) to max 1-3/8 in. (0 mm to max 35 mm). The cable to be tightly bundled together with the other penetrants.
- 5. Firestop System The details of the firestop system shall be as follows:
 - A. Fill, Void or Cavity Material* Wrap Strip Nom 3/16 in. (5 mm) thick by 1-3/4 in. (44 mm) wide intumescent wrap strip continuously wrapped around the through penetrant bundle twice with the ends held in place with masking tape. In floors, bottom edge of wrap strip to be recessed 2-1/4 in. (57 mm) from bottom surface of concrete floor. In walls, the wrap strip shall be installed on both surfaces such that the exposed edges of the wrap strip are recessed a max 1/2 in. (13 mm) from each side of the wall. HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC CP 648E Wrap Strip
 - B. Fill, Void or Cavity Materials* Sealant Min 1/2 in. (13 mm) thickness of sealant applied within the annulus, flush with top surface of floor or with both surfaces of wall. Additional sealant to be applied within interstices of through penetrant bundle and wrap strip to the max extent possible.

HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC -FS-ONE MAX Intumescent Sealant

* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.
