The hourly F, FH Ratings of the firestop system are equal to the hourly fire rating of the wall assembly in which it is installed.
- Through Penetrant — One or more steel electrical metallic tubing to be installed within the opening. The space between tubing shall be min 1/2 in. (13 mm) and max 5/8 in. (16 mm). Tubing to be rigidly supported on both sides of wall assembly. The space between tubing and periphery of opening shall be min 1/2 in. (13 mm) to max 2-3/8 in. (60 mm). The following types and sizes of metallic tube may be used:
