Section ii: handheld power saws (any blade diameter)

Current Hilti saws with wet cutting solutions
DSH 600-X
DSH 700-X
DSH 900-X

For instructions on how to assemble these systems, please refer to the Hilti North America Youtube page
TABLE 1 REQUIREMENTS

These systems fall under table 1, section ii: handheld power saws (any blade diameter). In order to be table 1 compliant, the below requirements must be met:

- Use saw equipped with integrated water delivery system that continuously feeds water to the blade
- Operate and maintain tool in accordance with manufacturer’s instructions to minimize dust emissions.

Table 1 states that no respirator is required if the above controls are fully and properly implemented.

<td>None</td>
</tr>
</tbody>
</table>

Check below to see how your system can be compliant with 1926.1153 Table 1. To verify the generation of your tool, check the rating plate, or call Hilti at 800-879-8000 with your serial number.

SYSTEM OVERVIEW

Handheld power saws from Hilti comply with table 1 through an integrated water delivery system to supply water to the cutting surface. Hilti currently offers the below systems with this configuration:

<table>
<thead>
<tr>
<th>Tool</th>
<th>Accessory</th>
</tr>
</thead>
<tbody>
<tr>
<td>DSH 600-X</td>
<td>DSH-P water pump</td>
</tr>
<tr>
<td>DSH 700-X</td>
<td>DWP 10 handheld water pump</td>
</tr>
<tr>
<td>DSH 900-X</td>
<td>Any gardena connector with a supplied water attached to Hilti tool</td>
</tr>
</tbody>
</table>

Note: previous generations of tools may have different item numbers or nomenclature. Check with your local Hilti representative or product instruction manual to verify.

DSH Handheld Gas Saw Dust Control — OSHA

Hilti developed gas saw cutting systems which are equipped with a water connection to be attached to a pressurized water source, compliant with OSHA 1926.1153, Table 1. The use of the Hilti DSH-P eliminates the need for a pressurized water source.

Set-up

1. Attach the water source to the tool.
2. Turn on the water
3. Verify that the user has the appropriate supply of water, and that the gas saw’s water valve functions properly.
4. See DSH gas saw operator’s instructions for additional information
   - Check for damage or leaks in the DSH gas saw’s valve and water tube
   - Verify the spray nozzles are not clogged, and direct the water to the cutting surface.

Cutting

1. Turn on the pressurized water source before beginning to cut.
   - Adjust the water valve to ensure proper water flow during cutting to minimize visible dust.
4. Maintain water flow until cutting is completed.

Cleaning and maintenance

- See manufacture instructions for wet cutting machines
