

# CP 619T FIRESTOP PUTTY ROLL

## Product description

- An intumescent, non-curing putty roll used in conjunction with firestop systems

## Product features

- Non-curing formulation
- Used in conjunction with Fire Blocks, Composite Sheets, and Firestop Boards
- Unique product packaging

## Areas of application

- Around cables and cable trays and assembly openings to provide additional smoke seal capabilities

## Advantage

- Pre-rolled packaging — easy to apply
- Non-curing — removeable and reusable

## Installation instructions

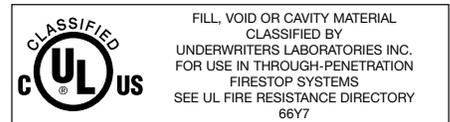

- See Hilti Literature or third-party listings for complete application and installation details

## Technical Data

### Tests and Approvals

UL listed firestop accessory when used in conjunction with CFS-COS Composite Sheet and CP 675T Firestop Board systems.
