Operating instructions
EG-Konformitätserklärung

Bezeichnung: Schrauber  Seriennummern: XX/0000001 - 9999999/XX
Typenbezeichnung: SB12  Konstruktionsjahr: 1996
Wir erklären in alleiniger Verantwortung, dass dieses Produkt mit den folgenden Normen oder normativen Dokumenten übereinstimmt:
EN 55014-1, EN 55014-2 gemäss den Bestimmungen der Richtlinien 98/37/EG, 89/336/EGWG, 91/157/EGWG, 93/86/EGWG

EC declaration of conformity

Description: Battery screwdriver  Serial no.: XX/0000001 - 9999999/XX
Designation: SB12  Year of design: 1996
We declare, under our sole responsibility, that this product complies with the following standards or standardization documents:
EN 55014-1, EN 55014-2 according to the provisions of the directives 98/37/EC, 89/336/EEC, 91/157/EEC, 93/86/EEC

Déclaration de conformité CE

Designation: Visseuse  No. de série: XX/0000001 - 9999999/XX
Modèle/type: SB12  Année de conception: 1996
Nous declaramos sous notre propre responsabilité que ce produit est conforme avec normes ou documents de normalisés:
EN 55014-1, EN 55014-2 conformément aux termes des directives 98/37/EC, 89/336/CEE, 91/157/CEE, 93/86/CEE

Declaração de conformidade

Designacion: Atornilladoras  No. de serie: XX/0000001 - 9999999/XX
Modelo/Tipo: SB12  Año de fabricacion: 1996
Declaramos bajo nuestra sole responsabilidad que este producto está en conformidad con las normas o documentos normalizados siguientes:
EN 55014-1, EN 55014-2 de acuerdo con las regulaciones 98/37/EC, 89/336/CEE, 91/157/CEE, 93/86/CEE

Declaração de conformidade

Designacão: Aparafusadora  Nr. de série: XX/0000001 - 9999999/XX
Designacão: SB12  Ano de fabrico: 1996
Declaramos sob nossa exclusiva responsabilidade que este producto cumpre as seguintes normas ou documentos normativos:
EN 55014-1, EN 55014-2 de acordo com as disposições das directivas 98/37/CE, 89/336/CEE, 91/157/CEE, 93/86/CEE

Konformiteitsverklaring

Omschrijving: Schroefmachine  Seriennummer: XX/0000001 - 9999999/XX
Type-aanduiding: SB12  Constructie-jaar: 1996
Wij verklaren op eigen verantwoordelijkheid dat dit produkt voldoet aan de volgende normen of normatieve documenten:
EN 55014-1, EN 55014-2 volgens de bepalingen van de richtlijnen 98/37/EG, 89/336/EEG, 91/157/EEG, 93/86/EEG

Konformitetserklæring

Betegnelse: Skruemaskine  Serienr.: XX/0000001 - 9999999/XX
Model/type: SB12  Fremstillingsår: 1996
Vi påtager os det fulde ansvar for, at dette produkt er i overensstemmelse med følgende normer og normative dokumenter:
EN 55014-1, EN 55014-2 i henhold til bestemmelserne i direktiverne 98/37/EF, 89/336/EØF, 91/157/EØF, 93/86/EØF
EG-Konformitätserklärung

Bezeichnung: Stundenlader  
Seriennummern: XX/0000001 - 9999999/XX

Typenbezeichnung: SBC 12 H  
Konstruktionsjahr: 1995

Wir erklären in alleiniger Verantwortung, dass dieses Produkt mit den folgenden Normen oder normativen Dokumenten übereinstimmt:

EN 60335-1, EN 60335-2-29, EN 55014-1, EN 55014-2, EN 61000-3-2, EN 61000-3-3 gemäss den Bestimmungen der Richtlinien 73/23/EWG, 89/336/EWG

EC declaration of conformity

Description: One-hour charger  
Serial no.: XX/0000001 - 9999999/XX

Designation: SBC 12 H  
Year of design: 1995

We declare, under our sole responsibility, that this product complies with the following standards or standardization documents:

EN 60335-1, EN 60335-2-29, EN 55014-1, EN 55014-2, EN 61000-3-2, EN 61000-3-3 according to the provisions of the directives 73/23/EEC, 89/336/EEC

Déclaration de conformité CE

Designation: chargeur rapide  
No. de série: XX/0000001 - 9999999/XX

Modèle/type: SBC 12 H

Safety precautions

**Caution:** The following fundamental safety precautions must always be observed when using electric tools/machines as protection against electric shock, the risk of injury and fire hazards.

Please read and take note of these precautions before you use the tool/machine.

1. Keep your place of work clean and tidy. Disorder where you are working creates a potential risk of accidents.

2. Make allowance for influence from the surroundings. Don’t expose your electric tools/machines to rain. Don’t use electric tools/machines in damp or wet surroundings. Make sure the work area is well lit. Don’t use electric tools/machines near inflammable liquids or gases.

3. Always protect yourself against electric shock. Never touch grounding (earthing) parts e.g. pipes, radiators, cookers, ovens, refrigerators.

4. Keep children away. Don’t let other persons touch the electric tool/machine or supply cord. Keep them away from your work area.

5. Keep your electric tool/machine in a safe place. Electric tools/machines not in use should be kept in a dry locked-up place out of the reach of children.

6. Don’t overload your electric tools/machines. You will do your work better and safer in the specified performance/rating range.

7. Always use the right electric tool/machine for the job. Don’t use underpowered tools/machines or attachments for heavier duty jobs. Don’t use electric tools/machines for work and purposes for which they are not intended, e.g. don’t use a hand-held circular saw to cut down trees or cut up branches.

8. Wear suitable clothing. Don’t wear loose clothing or jewellery – they could be caught up in moving parts. When working outside, the use of rubber gloves and non-slip shoes is recommended. Wear a helmet or cap if you have long hair.

9. Always wear protective goggles. If work causes dust, wear a mask as well.

10. Don’t use the supply cord for any other purpose. Don’t carry the electric tool/machine by the supply cord and don’t pull the plug out of the socket/ receptacle by pulling the supply cord. Protect the cable from heat, oil and sharp edges.

11. Secure the workpiece. Use a clamping device or vice to hold the workpiece. It is secured more reliably in this way than in your hand and you can then hold and operate your electric tool/machine with both hands.

12. Don’t bend over too far when working. Avoid an unusual stance. Make sure that you are standing firmly and keep your balance at all times.

13. Take good care of your electric tools/machines. Keep the drill bits, insert tools etc. sharp and clean so that you can do your work better, safer and more reliably. Observe the cleaning and maintenance regulations and the instructions for changing drill bits, insert tools etc. Check the supply cord regularly and have it renewed by a recognized specialist if it is damaged. Check the extension supply cord regularly and, if it is damaged, replace it. Keep grips and side handles dry and free from oil or grease.

14. Always pull out the plug from the mains if the electric tool/machine is not in use, prior to cleaning and maintenance work and when changing a drill bit, saw blade or insert tools of any kind.

15. Never leave a key in place. Always check before switching on that the key or adjusting tools have been removed.

16. Avoid any unintentional start-up. Never carry a plugged-in electric tool/machine with your finger on the switch. Always make sure that the switch is off when plugging the electric tool/machine into the main electric supply.

17. If an extension supply cord is used outside, only use one which has been approved for the purpose and is correspondingly marked.

18. Be attentive at all times. Keep your eye on your work. Remain in a sensible frame of mind and don’t use the electric tool/machine if you cannot concentrate completely.

19. Check your electric tool/machine for damage. You must check the safety devices or damaged parts carefully for perfect functioning in keeping with the intended purpose before using the electric tool/machine further. Check whether the moving parts function properly, whether they aren’t sticking, whether any parts are broken, whether all other parts work properly and are fitted correctly, and make sure that all other conditions which can influence operation and running of the electric tool/machine are as they should be. Damaged guards and protective devices and parts must be repaired properly by an authorized service workshop or replaced provided that nothing else is stated in the operating instructions. Damaged switches must also be replaced in the recognized service workshop. Never use electric tools/machines which cannot be switched on and off by the switch.

20. Caution! For your own safety’s sake, only use accessories and attachments which are specified in the operating instructions or in the respective catalogue. The use of accessories or insert tools or attachments other than those specified in the operating instructions can result in personal injury to you.

21. Only have repairs carried out by recognized electrical specialists. This electric tool/machine complies with respective safety regulations. Repairs may only be carried out by an electrical specialist otherwise an accident hazard for the operator can exist.

22. Connect dust extraction equipment. If devices are provided for the connection of dust extraction and collection facilities ensure these are connected and properly used.

Please keep these safety precautions in a safe place.
SB 12 battery screwdriver (12 volt)

Technical data
- Battery capacity: 2.0 Ah x 12 Volt = 24 Wh
- Speed (no load): 1st speed: 0–320 r.p.m., 2nd speed: 0–1150 r.p.m.
- Max. torque: 20 Nm (setting: drill bit symbol)
- Torque adjustment: 1–10 Nm in 20 increments
- Chuck clamping range: Quick release chuck 1.5–13 mm
- Weight: 1.9 kg (incl. battery and chuck)
- Speed adjustment: Electronic control switch
- Reversing switch: Electronic switch - locking device prevents operation while the motor is running
- Spindle lock: When the screwdriver is switched off
- Motor brake: Activated by the control switch
- Noise level: The typical A-rated noise level of the screwdriver is less than 70 dB (A)
- Vibration: Typical hand-arm vibration exposure is less than 2.5 m/s²

One-hour charger: see SBC12 H operating instructions

Battery:
- see SBP12 operating instructions

Right of technical changes reserved!

Safety
- The list of safety precautions must be observed!
- Do not use this product in any way other than as described in the operating instructions.
- Make sure the SBP 12 battery is securely attached to the screwdriver before beginning work.
- Do not continue operating the screwdriver until the SBP 12 battery is fully discharged. This may reduce the life of the battery cells.
- High temperatures increase the rate of battery self-discharge. Direct exposure to the sun or other sources of heat should be avoided.
- The chuck begins to rotate when the electronic on/off switch is pressed. To prevent battery discharge, ensure that the switch is not pressed during transport and/or storage. The on/off switch can be deactivated by setting the reversing switch to the central position.
- Use only Hilti original parts and accessories (SBC 12 H, SBC 12 M and SBC 12 C chargers, SBP 12 battery). This ensures optimum safety as these units have been designed to operate as a system of coordinated components.
- High drilling and screwdriving performance, high battery capacity and long life can be achieved only when the screwdriver is serviced correctly and insert tools are kept clean and in good condition.

Initial operation
- Charge the SBP 12 battery before beginning work. For best results, a new battery should be left in the charger for approx. 24 hours for the initial charge. This allows the battery cells to become balanced.
- For optimum performance, it is recommended that the screwdriver and battery are at room temperature before work begins. Keep the screwdriver and battery warm when working at low temperatures.

Environmental protection / recycling
The SBP 12 battery contains 10 nickel-cadmium cells. You share responsibility for protecting the environment by ensuring that used batteries are returned for recycling.

Important: Exhausted SBP 12 nickel-cadmium batteries should not be disposed of with household waste and should not be thrown into a fire or into water.

Return the exhausted batteries to your local Hilti centre so that they can be disposed of correctly.
Operating functions

1. **Switch with electronic speed control**
   Screwdriving speed can be adjusted smoothly up to maximum r.p.m. by slowly pressing the control switch.

2. **Reversing switch**
   The reversing switch is used to reverse the direction of rotation of the chuck. A locking device prevents operation of the switch while the motor is running. The control switch ① is deactivated when the reversing switch is in the central position.

3. **2-speed switch**
   The speed range can be selected by adjusting the 2-speed switch. (1st speed: 0–320 r.p.m. or 2nd speed: 0–1150 r.p.m.) This switch should be operated only when rotation has stopped.

4. **Torque clutch adjustment ring**
   The release torque (1 Nm to 10 Nm) is adjusted by rotating the adjustment ring to the desired torque setting (positions 1–10). The torque clutch is deactivated when the ring is set to the drill bit symbol. With the ring set to this position, the screwdriver provides a max. torque of approx. 20 Nm (blocking torque).

5. **Motor brake**
   The motor brake reduces the time taken for the chuck to stop rotating. This permits, for example, screws to be driven to an even depth for optimum appearance.

6. **Battery release button (2-finger operation)**
   To remove the battery, press the battery release buttons and pull the SB 12 battery out of the screwdriver.

7. **Quick-release chuck (1.5–13 mm)**
   The insert tool can be inserted or removed without the use of a chuck key. A locking device prevents rotation of the motor spindle when the control switch is in the OFF position. This feature is of assistance when tightening or opening the chuck.

Care and maintenance

The gearing section has been filled with sufficient grease during assembly. The screwdriver thus requires no maintenance. If used heavily over a long period of time, it is recommended that the screwdriver is returned to Hilti for inspection. This can extend the life of the screwdriver and avoid unnecessary repair costs. The air intake/exit slots should be kept clean. If an excessive amount of dust collects, clean the screwdriver by blowing out dust with a jet of compressed air.

Electric tools must comply with the applicable safety regulations. Servicing may only be carried out by a recognised electrical specialist. Optimum safety can be ensured by using only original Hilti spare parts.

**Warranty**

Hilti warrants that the tool supplied is free of defects in material and workmanship. This warranty is valid as long as the tool is operated and handled correctly, cleaned and serviced properly and in accordance with the Hilti Operating Instructions, all warranty claims are made within 12 months from the date of the sale (invoice date), and the technical system is maintained. This means that only original Hilti consumables, components and spare parts may be used in the tool.

This warranty provides the free-of-charge repair or replacement of defective parts only. Parts requiring repair or replacement as a result of normal wear and tear are not covered by this warranty.

Additional claims are excluded, unless stringent national rules prohibit such exclusion. In particular, Hilti is not obligated for direct, indirect, incidental or consequential damages, losses or expenses in connection with, or by reason of, the use of, or inability to use the tool for any purpose. Implied warranties of merchantability or fitness for a particular purpose are specifically excluded.

For repair or replacement, send the tool and/or related parts immediately upon discovery of the defect to the address of the local Hilti marketing organization provided.

This constitutes Hilti’s entire obligation with regard to warranty and supersedes all prior or contemporaneous comments and oral or written agreements concerning warranties.
