Re: Hilti X-HSN24 Steel Deck Fasteners

To Whom It May Concern:

The Hilti X-HSN 24 powder-actuated steel fastener is designed to replace the Hilti X-EDN19 and X-EDNK22 powder-actuated fasteners for use in attachment of steel deck to base steel ranging in thickness of 1/8-inch to 3/8-inch. The X-HSN 24 fastener has equivalent published diaphragm shear performance to the X-EDN19 and X-EDNK22 fasteners and, therefore, for those purposes should be suitable for use on any steel deck project where the X-EDN19 or X-EDNK22 fasteners are approved for use.

We hope the above information satisfies your need. If you have any further questions, please feel free to contact your local Hilti representative or contact me at the information below.
